

2100 Plus CB

The Vactor Plus CB provides all of the 2100 Plus benefits; improved air flow, operator ergonomics, enhanced safety, smart truck design and standard high dump on tandem axle chassis. The Plus CB has an improved air-routing system that provides an efficient air flow path for both the single-stage and dual-stage fan or a positive displacement blower configuration resulting in outstanding performance and maximum productivity. Ergonomic controls make it the Plus CB easy to operate and maintain.

For those who want to expand capabilities beyond catch basin cleaning and into vacuum excavation, the Vactor HXX option package can easily be added for exceptional hydro-excavation performance including a choice of 10 or 20 GPM water pump system and the 400k or 800k BTU water heater.

**The industry leading
Vactor 2100 Plus
combination sewer cleaner
is now available
in a Catch Basin Cleaner model!**
