RAISING THE BAR WITH REVOLUTIONARY TECHNOLOGY

SIMPLER. SMARTER. SMOOTHER.

When you start with a powerful machine that already delivers proven performance, versatility, operating ease and maneuverability, how do you make it even better? When it comes to our latest Ramjet®, we began by adding our exclusive IntuiTouch® controls for greater precision and enhanced productivity. Then, we improved the water plumbing to add even more storage options.

All together it's a package of performance and power unmatched in the industry:

- IntuiTouch control system with one-touch activation
- Low-maintenance Jet Rodder® water pump
- Park-N-Clean[™] technology for faster set-up at the job site
- Exclusive Modul-Flex design for maximum capacities and optimum weight distribution
- Stainless steel water tank offers greater strength and corrosion protection and comes with a 10-year warranty
- Superior cold weather operation that includes separate storage for wet and dry items

Like all Vactor® equipment, the latest Ramjet offers customized solutions, powerful support and unmatched quality.

MORE INTUITIVE THAN EVER BEFORE.

IntuiTouch In-Cab Controls

- One-Touch engagement to activate PTO allowing operators to gain control of all operational systems
- Operator can engage road, jet, and recirculation mode with single push-button ease

IntuiTouch Control Panel

- Ergonomic controls with up/down adjustment for individualized maximum comfort
- Glove-friendly tactile buttons
- Reliable touch buttons with backlit feedback enable the operator to know if a selected function is active
- Hose reel joystick significantly improves response time and pays in and out in the direction of the hose reel
- Operators have full control of the water system via a single Multi-Flow control dial - enabling them to precisely match the flow and pressure to the job requirements
- E-stops located at all operator control points bring the unit to a safe condition to protect both the operator and the equipment

MAKING THE BEST EVEN BETTER.

High-Performance Park-N-Clean™ Technology

A system that allows the operator to park near the manhole and be cleaning within minutes — requiring minimal setup time. This makes things easier for the operator and results in better fuel efficiency and less wear on components.

Exceptional Jet Rodder Water Pump

Leading the industry in longevity and worry-free maintenance, the Jet Rodde water pump delivers smooth flow at the nozzle for general cleaning and root cutting. Includes the powerful "Jackhammer" action to break up the toughest blockages.

Optional Jet Rodder Water Pump Heated Cabinet

The aluminum heated enclosure keeps the pump and plumbing — including the high-pressure reel and all ball valves — covered and protected at all times. This exclusive design optimizes performance of the truck in cold weather.

FRONT-MOUNTED VS. REAR-MOUNTED.

Whether it's a front or rear mounted hose reel, every Ramjet is built to your needs with quality tested components and backed by the most experienced dealer network in the industry.

Front Hose Reel

- Capacities up to 1 in x 1000 ft
- Rotates up to 270° to provide direct alignment to manholes
- Telescopes up to 15 in forward

Rear Hose Reel

- Capacities up to 1 in x 900 ft
- Rotates a total of 180°, 90° to curb side and 90° to street side to provide direct alignment to manholes
- Available integral aluminum shroud with heavy-duty, see-through windows is available

VACTOR SERVICE AND SUPPORT

VACTOR REBUILD PROGRAM

This comprehensive service program is designed to keep your Vactor equipment operating at top performance.

Including:

- An all-points vehicle inspection
- Genuine OEM replacement parts
- All work done by factory-trained technicians
- 10% parts discount
- Engineering improvements and retrofit options
- Equipment testing to factory specifications

Your equipment represents a significant investment for your community or business. With our Performance Upgrades you can maximize the life, long-term value, versatility and performance of your equipment. Retrofit options include updates to add new safety, productivity and performance features.

OPERATOR, MAINTENANCE & SERVICE TRAINING

To help you and your team get the most from all the performance features we build into our equipment Vactor offers a comprehensive training program that includes hands-on classses on operation, maintenance and service.

DISCOVER THE RENEWED RAMJET.

Performance you expect from a proven leader.

The Ramjet has long been one of our premier products, and this newest model takes its previous innovations even further. By providing greater precision, increased storage options and superior cold weather protection, these machines make the job safer, easier and more efficient for the operator.

Vactor has proudly been dedicated to continuously improving sewer cleaners for over fifty years, and the versatile and reliable Ramjet is just one of the highly customized solutions we offer.
